

OUR SCHOOL ROUTINE

Lenka Piklova, Eliska Kubu, Lucie Martinkova

This is our school

In the morning..

Every day the first thing we have to do is changing our shoes.

In case we don't do this, our English teacher gives us some English magazines to translate.

So when we have this done we go to the classroom.

Our lessons start every day at 8 o'clock.

We don't have every lesson in one classroom. We have lessons where only one subject is taught - Biology, Chemistry, Physics, English and French. We also have laboratories and two computer classrooms.

As you probably know, there are 16 classes in our school and each of them has its own classroom.

In the class..

This is our Physics classroom. As you can see there is a huge painting on the wall in the back. A few very talented students helped with the decoration of our school when it was being renovated.

In the Chemistry and Biology classroomss there are more paintings and you can see them even in the corridors.

Because of this our school looks very nice.

This is our English classroom. It is made just for a few students because of better connection with the teacher and better proving the language.

Corridors..

Lunch time..

For lunch, we have to leave our school and go to the nearby canteen. We used to have a canteen in our school but it has been closed since the last school year.

We don't usually make our lunches at home. Only a few students do that.

The canteen makes two and sometimes even three dishes so we can choose which of them we want. But when you don't like any of the options you can cancel your order over the Internet and make your own food at home or go buy it in a fast food place in the town.

Our canteen

- Our lessons don't end every day at the same time. That depends on our schedule as you can see below.

- You probably don't understand the names of the subjects, so this is for you to understand:

M (Math), KAj (English conversation), ZSV (Humanities), Fj (French) / some students have Nj (German), Tv (P.E.), Ch (Chemistry), D (History), F (Physics), CjL (Czech and literature), Aj (English), Z (Geography), B (Biology), KFj (French conversation) / some students have KNj (German conversation), L:F or S:B (practical Physics and Biology in laboratories)

So this is probably all we wanted to show you. We hope you like it. :)
