

Erasmus mobility in Vienna in support of a good cause

publié le 07/01/2026

Descriptif :

As part of the Erasmus+ programme, four students from classes 1MCVA and 1MCVB at Lycée de l'Atlantique in Royan took part in a three-week mobility period in Vienna, Austria, where they completed their work placement last December.

- ▶ As part of **the Erasmus+ programme**, four students from classes 1MCVA and 1MCVB **at Lycée de l'Atlantique in Royan** took part in **a three-week mobility period in Vienna, Austria**, where they completed their work placement last December.
- ▶ This experience enabled them to develop **both their vocational skills and their personal autonomy** in an **international environment**.
- ▶ During their stay, the students were supervised by an Austrian teacher of economics and management, who encouraged them **to take part in a charitable project**.

► They worked in Christmas market chalets, where they sold Glühwein (hot mulled wine) to visitors. The profits from these sales were donated to **the association Punsch4Uganda**, which finances **an orphanage in Uganda**, giving a **strong humanitarian and social aspect to their activities**.

► In addition to their professional duties, the students attended classes in the morning at the host school. This gave them the opportunity **to meet Austrian students of the same age and in the same vocational sector, to exchange ideas, and to compare education systems and professional practices.**

► The mobility also enabled the students to discover Vienna, its historical landmarks, its Christmas traditions and its cultural differences. They became **more aware of cultural diversity and improved their communication skills in a foreign language.**

► Finally, **this Erasmus experience represents a real asset for the students**, as it allows them to take **the mobility assessment**, which gives them additional points for the French Baccalauréat.

Overall, this project **was a rewarding and enriching experience, both professionally and personally.**
