

Erasmus + mobility in Malta for Les Grippeaux Vocational High School in

Parthenay

publié le 29/06/2026

Par Mme Karine Auger, LP les Grippeaux à Parthenay.

► This year, Les Grippeaux High School sent four students **to Malta** : two electricians (1 MELEC) and two sales students (1 MCV).

► We were helped by **an intermediary organization called Breakaway**, which helped us find host families and suitable companies.

- We had two video meetings with them. **The students introduced themselves and talked about their professional experience** in order to find the best companies. The teachers also worked with them on the objectives of the work placement and the evaluation system.
- The two teachers who left with the students at the beginning also prepared them beforehand by providing **the necessary linguistic knowledge related to their jobs** (for the sales students, this was done during the European sales class), as well as the information needed for everyday life in Malta. Moreover, we talked about **the mobility exam** and the necessity to have **cultural visits to understand the history of the country**.

► The benefits of such an experience include **comparing different ways of life and working practices in their professions**, becoming **more autonomous** by travelling by bus and plane, and **speaking English all the time**.

They also become aware that they **will be able to work anywhere in Europe** and manage on their own without their parents.
